

Making video run smoothly

When watching video during a video conference, sometimes more bandwidth is required. This can be achieved by changing the viewing source.

1. The default is Take control of Video Conference.

16

2. Normally Slide Show Send (to their projector 2 of) has the default choice of Room PC. Turn that OFF.

3. Instead, use What you Want Them to See (on their projector1) and select Room PC.
